

ONE-AP REDUCED APPLICATION FERTILIZER

MAINTAIN NORTH

One-AP™

ONCE A YEAR FERTILIZER

www.one-ap.com

ONE AP 38-0-7

100%(eN)

WITH CAVALCADE OR MILLENNIUM ULTRA

- Specially designed to be applied once in the Spring to low maintenance commercial properties for season long feeding. In combination available for preemergence weed control or post broadleaf weed control.
- Balanced release formula for the northern growing zone with specialized efficiency nutrient, (eN)60, (eN)120 and (eN)180.
- Additionally contains (eN)Gevity delivering the season long assurance to last seven, eight and even nine months if needed.
- TWO combination options. Cavalcade for superior crabgrass and annual broadleaf weed control also offered in combination with Millennium Ultra post treatment broadleaf weed control on commercial sites.
- (eN) efficiency nutrients contain a unique membrane that selectively allows soil moisture to diffuse through the coating, gradually dissolving the urea fertilizer.
- In addition to many efficiency characteristics also reduces labor by more than 50% making it one of the most economical application and a great fit for efficiency nutrient management (eNM) programs.
- Environmentally Friendly, reduces yearly nitrogen use up to 50% & nearly eliminates nitrogen run-off and leaching, meeting standards for “ECO Choice Plant Nutrient” Certification.
